How to keep Bishop Walsh clean and green

Bishop Walsh has serious environmental problems that we need to tackle. We ought to solve the problems and improve our environment. Therefore, we write this article to encourage all of you to go green.

Firstly, some students threw rubbish on the ground. It causes land pollution. Therefore, we ought to organize a poster design competition and put up posters in the corridor.

Most students did not finish their lunch. It causes land pollution, too. Therefore, we ought to encourage students not to waste food and finish their lunch. And we can reduce the amount of the food in our lunchbox in order to reduce the leftovers.

Moreover, students produce too much waste. If we don't stop it, the landfills will be full soon. Therefore, we ought to reduce the waste and make use of the recycling bins.

I hope we can keep our school clean and green. Let's take action now!

A Lovely Kitten

Yesterday, Ben saw a lovely kitten in a park. The kitten was small with brown fur and a long tail. Ben and the kitten played with a park happily.

Then, the kitten saw a nest on a tree. It felt very excited as there are a few birds tweeting in the nest. The kitten climbed up the tree immediately as it wanted to catch a bird. Ben was shocked.

The birds flew away at once when they saw the kitten. The kitten could not catch any birds. When the kitten wanted to climb down the tree, it felt scared as the tree was so tall. Ben worried about the kitten. Ben called the firemen at once. The firemen saved the kitten at last. Luckily, the kitten did not get hurt. Ben was relieved that the kitten was rescued.
